From feeding, farming to fishing, Stardew Valley has all the options a player could hope for from a relaxing game. While most of these activities are fairly easy to take care of, fishing has always been a notoriously difficult task because of its complex mechanics. Especially difficult for those who are new to the game and who still practice their fishing skills properly, it can get incredibly frustrating trying to catch even the simplest fish or even dream of one day catching legendary fish. Don't worry, because we're here to share ten tips to turn you from a beginner into an experienced fisherman. Updated on March 10th, 2020 By Anastasia Maillot: With a 1.4 update to Stardew Valley out, some aspects and features of the game have been changed. There have been tons of new facilities added to the game as well, with much-needed quality of life improvements that will make fishing a little easier for especially new players. With all these new features, we decided to share five additional fishing tips in Stardew Valley that take into account changes to the latest update. With these, fishing and completing these difficult social center strata should be a breeze. 15 Use crab pots Once the player has reached level 3 fishing, crab pots will be available on the craft menu. These small pots can be placed in water almost anywhere and they will bring resources the next day. The meat bug can be turned into bait, which then has to be placed inside these crab pots. If a player has a Luremaster profession, you don't need to add bait. Crab pots are shiny because they will actually count on fishing skill when harvesting, even if the player only gets the trash out of his pot. Each pot collected gives 5 points of experience. If a fishing mini-game leads the player nuts, this is a really good way to increase skill with minimal effort while earning money. 14 Favor Wild Bait There are currently three types of baits in the game: regular baits, magnet and wild baits. Although they all have their pros and cons and various utilities, since the 1.4 upgrade wild bait option has become even more appealing. Now that players are using wild baits, they actually have a chance to catch two fish at the same time. This significantly reduces the load when trying to catch fish. However, in order to actually get a prescription for this, the player must befriend Linus, a homeless man living in a tent in the mountains. Once in four hearts with him, go to his tent from 8pm to 12am on a clear night and he has to provide a prescription. 13 Go For Perfect Catch The Perfect Catch may sound like a mission impossible, but after an update of 1.4, it's even more important to focus on it. Fish exceeds the bar, the player has lost the chance of a perfect catch, even if they still manage to catch the catch Having the perfect catch after 1.4 actually bumps into the quality of the fish by one point. This means that the catch that is usually silver will now be gold, and the golden catch will be the quality of the iridium. Time to train this perfect fishing method! 12 Get Trained Rod There have been tons of complaints about how extremely difficult fishing mini-games are, and while the game won't see any major changes put into it, there's good news for those who hate fishing. 1.14 introduced a new fishing pole called Training Rod, which is extremely cheap for 25 golds in Willie's store. Fishing with this fishing rod is very easy compared to other rods, and stumbles upon the player's fishing skills temporarily. The rod is perfect for any beginner. However, keep in mind that only the basic qualities of fish can be caught with a training rod. In addition, only fish that have a difficulty level of less than 50 points can be caught. That being said, the amount of experience the amount of experience in the training rod is still the same, making it incredibly effective at aligning fishing skills quickly for a better fishing experience. 11 Buy Fish Pond While the fish pond is more mid to late farm building game, it's a great addition to players who want to enhance their fishing skills. The fishing pond is a brand new item with 1.4 upgrades, and it basically allows the player to fill one pond with one type of fish. Any kind of fish, with the exception of the legendary fish, can be placed in a pond. The fish will bring in a variety of resources over the next few days. Collecting these resources will be a great player some fishing experience as well as a good variety of items depending on the type of fish. It's the perfect way to get caviar securely. 10 Understand the Mechanics The Biggest Challenge many players find themselves coming up with is a pure misunderstanding of how fishing mini-games actually work. There are two ways to move a green bar to follow a fish icon that moves up and down: slow clicking and releasing, or continuous fast-paced clicking. The first will shoot up the bar high and allow you to catch up with the fast movement of the fish, while the second supports the bar at a set level when the fish is not moving. When casting the beaver, using the WASD keys will also direct it left and right. Once you master this, the mini-game will be a breeze. 9 Early game spots When you first start a game and don't have fishing skills, there are two places where we recommend fishing: the river that runs through Pelican Town and the ocean. These two locations will have the easiest to catch fish, including sardines, anchovies, Smallmouth Bass, and Sunfish. All four are relatively easy to catch, with a fairly predictable movement that will allow you to grind those early levels of fishing skills quickly, and sell your catch at a decent price in Willie's store. 8 Level Up Is Obvious. To better fish, more fishing and not dingy from mini-games early on. Once you level up, the green bar in the mini-game will expand in size and make it easier for you to track the fish. To level quickly once you get access to The Hidden Forest you will also gain access to a small pond which is a great way to get levels quickly. Setting up crab pots when you feel really frustrated is also a great way to get these levels without actually going through the fishing effort. 7 Invest in a better kind, like all your other tools, Bamboo Rod, which you first get from Willie at the beginning of the game, can be switched to Fiberglass Rod and then end up on Iridium Rod, which is the best in the game. Fiberglass Rod allows you to use bait in fishing, which will increase the number of fish attracted to you and Iridium Rod allows in addition to this to use tackles that can attract specific species and species of fish. This is especially useful when you are looking to catch a rare fish. 6 Learn the behavior of fish Every fish in the Stardew Valley is unique and the way they behave is different from each other. Long before you even know which fish you're going to catch, you can make a pretty educated guess by just watching the fish move to the mini-game bar. Some fish will dart up and down quickly, while others will move slowly and then maintain a set position. Others will have a mixture of these two and make it even more of a headache for you to catch them. However, learning the swimming patterns of each fish and learning to recognize them will help you a lot in the long run. 5 Know, at the right time Let's say you want to catch a squid. How do you find it? It is important to understand that some fish appear only at certain times of the year and even at certain times of the day. The elusive squid is only available during the winter months at night. Similarly, the octopus is only available at night, but only in the summer months. Weather conditions can also affect whether fish are available. Som and Shad tend to prefer rainy days, while Sunfish and Rainbow Trout prefer to appear on sunny days. Knowing when the fish you want to catch is available is absolutely essential. 4 Being in the right place is not only a time needed, but location, too. You won't find the same fish swimming in the ocean as you do in the river or in the lake. Keep in mind that the river that starts in the mountains is known as a mountain lake, and will contain very different fish from those caught in a river town or forest river. Once you go further down into the mines, you will also find underground ponds that will have a rarer catch, and after unlocking the desert, you will have access to two more species of exotic fish. 3 Look at the bubbles and depth every once in a while you can detect a set of bubbles and ripples in the pond. This suggests that the place is rich in fish. Give it a shot Your bobber right in this place and you will notice more fish will rush into this area. Another good trick is to try Throw the beaver into the area in water that is darker in color and therefore deeper than the rest. 2 Get Trap Bobber Talking about tackles, there are several options available in the game and they are all useful depending on what kind of fish you want to catch. However, there is one item above each other that we really recommend getting: the Bobber trap. Once equipped, the progress of the bar during the mini-game will deplete 66% slower, making fishing much more forgiving for players who may struggle to catch these pesky, elusive legendary fish. Keep in mind that you should have an Iridium Rod to equip one. 1 Eat Fishing Boosters The last thing you can do to make the job easier for yourself, especially at lower fishing levels, is to consume foods that will momentarily elevate your fishing skills. You can buy trout soup from Willie's store which will encourage your fishing at 1 euro and eventually as you progress through the game you will find a recipe for a dish about 'sea' that will encourage your fishing at 3 euros. If you become friends with Willie and get three hearts, he will send you a recipe Clam Chowder, which is relatively easy to make and will increase your fishing by 1 euro.
